TESTOUT - IT

Entry Requirements: No Entry Requirements
Duration: 6 months per subjects

PC PRO

Many IT professionals begin their careers in IT support-related positions. The main purpose of the TestOut PC Pro certification is to verify necessary skills to work as an IT support professional. In an IT support job, you'll be asked to install, repair, configure, secure, and manage computer hardware, operating systems, and software in home or corporate environments. These are the most basic and foundational skills required of all IT professionals. Additionally, communication, listening and analysis skills are essentials for interacting with customers.

NETWORKING PRO

TestOut Network Pro CertificationThe TestOut Network Pro certification measures an examinee's ability to perform tasks commonly performed by IT network professionals, including systems administrators, network administrators, network engineers and related careers. The core responsibilities of these job roles typically revolve around the management of hardware and software networking components and include IP configuration, setting up wireless and wired networks, managing networks, basic network security, software updates, hardware upgrades and network protocols. IT network professionals must also master fundamental computer support and maintenance which are covered in TestOut's PC Pro certification exam.

SECURITY PRO

The TestOut Security Pro certification measures an examinee's ability to perform tasks commonly performed by IT security professionals such as network and systems administrators and IT security specialists. These professionals are typically responsible for helping to implement and maintain security protocols and best practices. Passing the TestOut Security Pro Certification means you are capable of implementing layered security through group policy objects, access control lists, wireless and wired local area network security measures, and workstation and mobile device security measures.
